CURRENT NIH-FUNDED RESEARCH PROJECTS (as Co-Investigator):

R01 CA210259 PIs: Buller/Walkosz 08/01/2017 – 07/31/2022
Using Technology to Scale-Up an Occupational Sun Protection Policy Program
This project will design, implement, and evaluate the scale-up of an occupational skin prevention program in order to determine the most cost-effective approach for national distribution of an evidence-based sun safety program.

R01 CA206569 PIs: Walkosz/Dellavalle 01/15/2017-01/01/2021
Sun Safety Ink: A Skin Cancer Prevention Program for the Tattoo Community
This project proposes to develop a skin cancer prevention program, Sun Safety Ink! (SSI). This program will be targeted to licensed tattoo studios, who already include aftercare instructions for sun protections for tattoos and have many younger people as clients who are also less likely to practice sun safety.
